**Contents:**

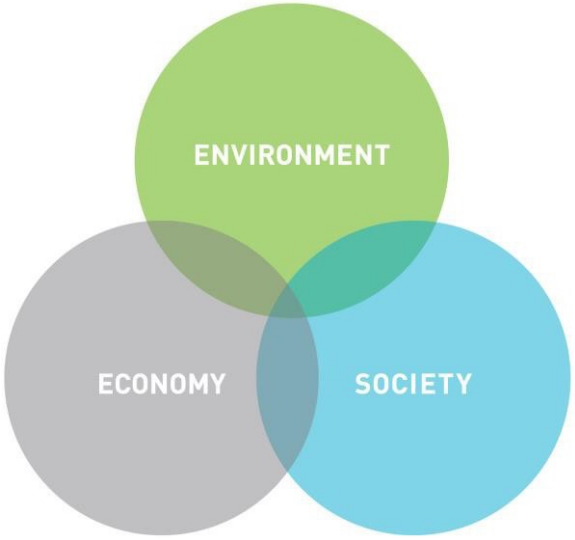
Sustainability Explained.
Stakeholder Analysis
Materiality Matrix
Community Relations
Sustainability Environmental
Performance

## SUSTAINABILITY EXPLAINED

What is a simple definition for sustainability?

Sustainability is meeting our own needs without compromising the ability of future generations to meet their needs. In addition to natural resources, we also need social and economic resources.

### *What would a sustainable world look like?*



### Environmental Sustainability

Ecological integrity is maintained, all of earth's environmental systems are kept in balance while natural resources within them are consumed by humans at a rate where they are able to replenish themselves.

### Economic Sustainability

Human communities across the globe are able to maintain their independence and have access to the resources that they require, financial and other, to meet their needs. Economic systems are intact and activities are available to everyone, such as secure sources of livelihood.

### Social Sustainability

Universal human rights and basic necessities are attainable by all people, who have access to enough resources in order to keep their families and communities healthy and secure. Healthy communities have just leaders who ensure personal, labour and cultural rights are respected and all people are protected from discrimination.

## STAKEHOLDER ANALYSIS

**A stakeholder analysis has been carried out and a graphical illustration can be seen below.**

- Stakeholders have been categorised as, Primary, Secondary and Key.
- Primary stakeholders: are those ultimately affected, either positively or negatively by an organisation's actions.
- Secondary stakeholders: are persons or organisations who are indirectly affected by an organisations actions.
- Key stakeholders: who can also belong to the first two groups have significant influence upon or importance within an organisation.

Hy-Ten will engage with stakeholders through face to face communication, e-mail, telephone, site visits, and surveillance audits, questionnaires to determine our performance and how we can further improve the long term security of the business.

Hy-Ten will always attempt to ensure our stakeholders views and concerns are considered while making any business decisions.

Please feel free to contact us for any further information.

## MATERIALITY MATRIX

The materiality analysis helps us to identify the economic, social and environmental issues that are most important to our business and our stakeholders. Conducting a thorough analysis in this way not only helps identify issues to be covered in our reporting but also supports decisions on where to focus internal resources.

| Material Aspects | Ability to Impact (high / low) |
|---|---|
| Contribution to Diversity and Stability of the Local Economy | High |
| Slave Labour | low |
| Child Labour | low |
| Energy Use | high |
| Water Use | low |
| Biodiversity | low |
| | |
| | |
| | |

| Material Aspects | Ability to Impact (high / low) |
|---|---|
| Stable Employment | High |
| Safe and Healthy Working Conditions | High |
| Human Rights | High |
| Workers' Conditions | High |
| Primary Material Use and Materials Efficiency | High |
| Fair wages | High |
| | |
| | |
| | |

| | |
|---|---|
| | |
| | |
| | |
| | |
| | |
| | |
| | |

| | |
|---|---|
| | |
| | |
| | |
| | |
| | |
| | |
| | |

Less <-- Importance to Stakeholders and Society --> More

Less <-- Importance to Company --> More

| |
|---|
| Economic Aspects |
| Social Aspects |
| Environmental Aspects |

## COMMUNITY RELATIONS

**Community relations are important to Hy-Ten and we use various methods to establish and maintain a mutually beneficial relationship with the communities in which we operate.**

We strive to develop relationships to help foster our brand and our good name while the community receives support from our initiatives.

# HY-TEN Performance Report

## SUSTAINABILITY / ENVIRONMENTAL PERFORMANCE (Site Objectives)

| | Target 2024 | Actual | Target 2025 | Actual |
|---|---|---|---|---|
| **Scrap per tonne of produced material: Bootle 1** | 1.92 % | 0.905 % | 1.9% | 1.14% |
| **Scrap per tonne of produced material: Bootle 2** | 0.96 % | 1.09 % | 0.95% | 0.8% |
| **Electricity Consumption target per tonne of produced material Bootle** | 23.78 KWh/te | 19.70 KWh/te | 23.54 kWh/te | 22.94 kWh/te |
| **Gas Consumption per tonne of material of produced material Bootle** | 1.43 KWh/te | 1.19 KWh/te | 1.41 kWh/te | 2.07 kWh/te |
| **Water Consumption target per month Bootle:** | 210 $m^3$ | 92.3 $m^3$ | 208 $m^3$ | 99.5 $m^3$ |
| **Lost Time Injuries in period** | 0 | 1 | 0 | 1 |
| **Lost Time Injury Frequency Rate Bootle:** | <18.6 | 7.2 | <18.4 | 9.77 |
| **Recycled Waste Bootle: Go Green** | 88.46 % | 100 % | 89.34% | 100% |
| **Recycled Waste Bootle: 1st Choice** | 88.46% | 100 % | 89.34% | 100% |
| **Total Training Hours Bootle:** | 200 | 316 | 250 | 1293 |
| **No of Complaints Bootle** | 0 | 0 | 0 | 0 |

Site Objectives / Targets are improved each year by 1% to target a gradual overall site improvement

Note:

Data collated to generate the information within the report, and any further Third Party assessments (i.e. CARES SCS) has a limit of TIER 1 suppliers data only.
