CASE HISTORY :- AMH, Highgate

Remedial works to wrap around geogrid earth faced embankment

GABION WALL ADVICE HY-TEN GABION SOLUTIONS

Geogrid wrap around reinforced soil embankments can be visually unacceptable, HY-TEN was requested to provide a solution to reface the embankment to provide a quality structure that could then be planted.

The solution was to install 2m long pins into the existing bank on a grid set at a suitable distance above the sloping face so that an even face could be formed. To the pins a heavy reinforcement fabric was laid and then a 150mm soil filled special reveting mattress was tied back to the reinforcement fabric.

If you would like Hy-Ten to design and supply gabions and land reinforcement products for you, please contact us on 01902 712200.
