CASE HISTORY :-GARDEN CENTRE, BURWASH COMMON

SUB CONTRACTOR	PETALS FOR PLANTS
CONSTRUCTION	2005 ONGOING TO 2006
GABION WALL DESIGN	HY-TEN GABION SOLUTIONS

Construction of a major new garden centre required a number of gabion retaining structures and landscape feature walls across the site.

Being a garden show centre, a high standard of gabion installation was required. The Hy-ten Gabion 700 system was the preferred option. The higher quality of installation achievable with this system is due to the combination of mesh wire diameters (heavier wires to face and rear panels), smaller cell size than standard gabions and helical connectors which are automatically provided with the unit.

The development of the site will be ongoing until 2006 with further extensive use of gabion walling to car park and access roads.
