CASE HISTORY:- Cornwall University Campus, Tremough.

CONTRACTOR	J B Leadbitter and Co Ltd.
CONSTRUCTION	Fred Champion Groundworks Ltd.
GABION WALL DESIGN	HY-TEN Gabion Solutions

The retaining wall was designed and supplied using the Hy-Ten Gabion 700 System.
The gabion units were of varying dimensions to suit and made from 76.2mm x 76.2mm mesh with 4mm wire for the face and rear panels and 3mm wire for the body panels. All wire was Triple Life coated (95% zinc, 5% aluminium).

The gabion wall was of varying height between 3.5m and 4.5m at the rear of the new student accommodation block. Approximately 2000 cubic metres of local stone was used as gabion fill. There is also gabion wall cladding to some of the faces of the accommodation block.

If you would like Hy-Ten to design and supply gabions and land reinforcement products for you, please contact Steve Lisle or Greer Charlton on **01902 712200**.
