CASE HISTORY :- DUNGENESS VISITORS CENTRE

GABION WALL DESIGN	HY-TEN GABION SOLUTIONS
CONSTRUCTION	2005

The architect for the visitors centre at Dungeness required a bund wall along the front of the visitors centre to shield it from the car park.

The local stone available at Dungess is a medium sized shingle, the architect required the gabions to be filled with shingle, therefore, a galvanised coated welded mesh of size of 50.4mm x 50.4mm was chosen to ensure the mesh retained the fill.

Since this is a public area Helical connectors were used for health and safety reasons.

Hy-Ten Gabion Solutions also provides design services and technical support, for further information please contact :
