CASE HISTORY :- EBBSFLEET INTERNATIONAL STATION CHANNEL TUNNEL RAIL LINK

GABION WALL DESIGN	HY-TEN GABION SOLUTIONS
CONTRACTOR	JACKSON CIVIL ENGINEERING
CONSTRUCTION	2005

Hy-ten Gabion Solutions have supplied a number of the Channel Tunnel Rail Link contracts unfortunately most are inaccessible for photographing, however, at Ebbsfleet station gabions have been constructed as retaining walls adjacent to a pedestrian underpass to the car parking area.

The main design was carried out by consultants with the gabion design by Hy-ten Gabion Solutions. Hy-ten supplied standard gabions with triple life corrosion protection. A heavier 4mm wire diameter was used on the face of the gabions with the body of the gabion in a 3mm diameter wire to maintain a planar face

Hy-Ten Gabion Solutions also provides design services and technical support, for further information please contact :
