CASE HISTORY:- Ha Ha near High Wycombe

CONTRACTOR	Bowles and Wyer
GABION CONTRACTOR	Verdant Solutions
DESIGN & SUPPLY	Hy-Ten Gabion Solutions

A private residence required an 80 metre long Ha Ha as part of the landscaping in its extensive grounds (a ha ha is an inverted fence / trench - it was a common feature of 17th and 19th century estates and allowed uninterupted views across gardens and estates whilst providing a barrier to livestock).

The wall of the ha ha consists of a Hy-Ten designed gabion retaining wall at 1.4m high above finished ground level to support the lawned area.

Now that the landscaping is finished, the garden area has an uninterupted view of the surrounding countryside.

The Hy-Ten 700 System was used with the gabions manufactured from 76.2mm x 76.2mm welded mesh with 4mm diameter welded mesh for the front and rear panels and the rest of the units manufactured with 3mm diameter welded mesh. Local limestone was used for the fill.

If you would like Hy-Ten to design and supply gabions and land reinforcement products for you, please contact Steve Lisle or Greer Charlton on **01902 712200**.
