CASE HISTORY:- Manchester Ship Canal

CONTRACTOR	Manchester Ship Canal
CONSTRUCTION	Winter 2006
GABION WALL DESIGN	N/A

Hy-Ten Gabion Solutions supplied Woven Mesh Gabions to Manchester Ship Canal for their ongoing maintenance project which include new build and replacement. The projects are designed to protect against bank erosion from wave action and slippage.

The gabions supplied where made of high density polyethylene (HDPE) coated 80mm x 100mm x 2.7mm zinc wire. The grey HDPE coating had a nominal radial thickness of 0.5mm. The units were filled with limestone.

Hy-Ten also supplied 60 no L602 sheet piles at 5.5m long for protection works which combined both piles and gabions

If you would like Hy-Ten to design and supply gabions and land reinforcement products for you, please contact Steve Lisle or Greer Charlton on **01902 712200**.
