CASE HISTORY:- Nottingham Science Park

CONTRACTOR	Morgan Ashurst
DESIGN & SUPPLY	Hy-Ten Gabion Solutions

This new development is surrounded by very natural landscaping, in fact in many areas it appears to be wild and unkempt. This is intentional and the wide variety of gabion elements have all been blended into this landscaping.

Free standing gabion walls have been used around the ground floor of car parking areas and both vertical and trapezoidal sections have been incorporated in different areas around the building perimeter. There are also some gabion retaining walls and blocks of gabions that have been used as features. All of the gabions blend into the overall appearance due to the wild grasses and other elements of the grounds.

Hy-Ten Gabion Solutions manufactured the gabion units from their high quality triple life coated welded mesh using wire diameters of 4mm and 5mm where appropriate. Local natural stone fill was used to compliment the other natural elements of the project.

If you would like Hy-Ten to design and supply gabions and land reinforcement products for you, please contact Steve Lisle or Greer Charlton on **01902 712200**.
